EXECUTIVE PROFILE

Enterprise technology executive with 20+ years of progressive responsibility across technology strategy, digital transformation, enterprise architecture, program delivery and large-scale technology environments. Combines strategic judgment with disciplined execution, commercial awareness and people leadership. Former IT Director accountable for a SAR 15M+ technology function, a 50+ multidisciplinary team and a 300+ site estate; currently VP - Head of Business Technology Quality Control at Riyadh Bank. Trusted to translate business priorities into clear technology direction, build capable teams, lead complex change and sustain delivery in demanding environments.

PROFESSIONAL EXPERIENCE

VP - Head of Business Technology Quality Control | Riyadh Bank

Dec 2022 - Present | Riyadh, Saudi Arabia

- Founded and lead the Business Technology Quality Control function, establishing its operating model, standards, KPIs and delivery-quality framework.
- Led the technology organization to ISO 9001 certification and CMMI Level 3 appraisal, while reducing SDLC quality findings by more than 80% through embedded quality gates, root-cause analysis and continuous improvement.
- Lead the ongoing ISO 20000 initiative as Business Owner, providing executive direction and sponsorship while assigning meaningful delivery ownership to experienced project leadership.
- Embedded Jira-based automation across approximately 40% of assurance operations, releasing capacity and strengthening management visibility through data and KPIs.
- Build team capability through hiring, mentoring, progressive standards and meaningful delegation, matching talent with broader responsibilities and development opportunities.
- Partner with Internal Audit, Risk and technology stakeholders on SAMA ITGF compliance, cybersecurity oversight, remediation, portfolio insight and executive reporting.

Director of Information Technology | Saudi Automotive Services Company (SASCO)

Nov 2020 - May 2022 | Riyadh, Saudi Arabia

- Defined and executed technology and digital strategy for a nationwide fueling-and-retail network spanning 300+ sites, with a SAR 15M+ annual budget and a 50+ multidisciplinary team.
- Directed a 23-initiative transformation portfolio spanning Microsoft Dynamics 365 implementation/rollout, cloud and data-center transformation, enterprise architecture and automation of 180 fueling stations.
- Led end-to-end technology enablement for a new eight-floor corporate headquarters from construction-stage planning through phased occupancy, integrating infrastructure, networks, communications, systems, data-center capability and continuity requirements.
- Adapted migration and employee-enablement plans to changing executive priorities, sequencing transition while maintaining business continuity and service readiness.
- Led migration of approximately 80% of systems toward cloud solutions while protecting service continuity across branches and corporate functions.
- Strengthened enterprise resilience following a major regional connectivity disruption by restoring critical services and establishing alternate-provider backup connectivity.
- Led a SAR 5M multi-year telecommunications engagement across the 300-site estate, linking investment to support reach, operational efficiency, risk reduction and continuity.
- Influenced business initiatives toward digitally aligned alternatives and partnered with the CEO and executive team on strategy, transformation priorities, complex programs, risk exposure and board-level reporting.

LEADERSHIP SIGNATURE

Strategic Judgment
Business-First Technology Leadership
Disciplined Follow-Through
People Development & Empowerment
Constructive Executive Challenge
Resilience Under Pressure
Trusted Stakeholder Partnership

HOW I LEAD

Clarify: turn complexity into priorities, ownership and executable direction.
Connect: link technology choices to business value, risk and long-term sustainability.
Empower: give capable people meaningful authority with clear standards and accountability.
Challenge respectfully: raise concerns with evidence and alternatives while protecting trust.
Follow through: stay engaged from decision through delivery, learning and improvement.

SCALE & IMPACT

20+ Years in Technology

Executive & Board Engagement

PROFESSIONAL EXPERIENCE - CONTINUED

Information Technology Manager | Mueen Human Resources Company

Mar 2016 - Nov 2020 | Riyadh, Saudi Arabia

- Built the technology function from the ground up, establishing platforms, infrastructure, budgeting, governance and service-management foundations.
- Advised the CEO on technology strategy and translated business priorities into a practical roadmap with measurable business value.
- Promoted sustainable ownership, continuity and structured handover across externally delivered digital initiatives, strengthening long-term operating accountability.
- Modernized digital workplace and workforce services supporting 120+ staff, 6 branches and 4 accommodation centers, while sustaining full business continuity through the pandemic with zero disruption.

Earlier Career

Quality Assurance Engineer | Schneider Electric | Sep 2009 - Aug 2010 | Riyadh

Systems & Support Engineer | Schneider Electric | Sep 2007 - Aug 2009 | Riyadh

PC Specialist | Arab National Bank | Mar 2006 - Jul 2007 | Riyadh

Network Administrator | Fitaihi Holding Group | Jul 2003 - Mar 2006 | Jeddah

EXECUTIVE LEADERSHIP APPROACH

Strategic Judgment

Balances immediate priorities with long-term value, ownership, scalability, continuity and risk before committing resources or direction.

Execution Under Complexity

Creates structure around ambiguous or changing conditions, aligns stakeholders, sequences delivery and maintains momentum toward the intended outcome.

People Leadership

Combines high standards and disciplined follow-through with accessibility, coaching and meaningful authority, enabling people to grow into broader responsibilities.

Business-Centered Technology Leadership

Connects technology choices to business direction, customer and operational needs, and sustainable value rather than treating technology as an isolated function.

Commercial Discipline

Evaluates technology investment through business value, service reach, efficiency, resilience, supportability and risk reduction.

Resilience & Continuous Improvement

Treats disruption, findings and operational friction as signals for stronger architecture, controls, redundancy and operating capability.

Executive Partnership & Discretion

Works across senior leadership, business, risk, audit and external partners with clarity, respect, evidence and institutional discretion.

LEADERSHIP CHARACTER

Accountability - owns outcomes through completion.

Reliability - consistent follow-up and commitment to delivery.

Composure - brings structure and direction under pressure.

Respect - challenges ideas without diminishing people.

Development - raises standards while creating room for others to grow.

Discretion - protects institutional trust and sensitive context.
